

MONTANA STATE HOSPITAL POLICY AND PROCEDURE

INFECTION CONTROL – CARE OF CONTAMINATED ARTICLES

Effective Date: June 1, 2017

Policy #: IC-07

Page 1 of 4

- I. PURPOSE:** To identify methods for handling clothing and linen contaminated with bloodborne pathogens, other disease causing organisms, or parasites.
- II. POLICY:** Contaminated personal articles and linen will be decontaminated before they are returned to the patient or to the unit.
- III. DEFINITIONS:**
- A. Standard Precautions - the routine and consistent use of appropriate barrier protection to prevent skin and mucous membrane transmission of microorganisms resulting from contact with blood and body fluids, and as part of the practice of **general hygiene**. **All human blood and certain human body fluids are to be treated as if** known to be infectious for HIV, HBV and other bloodborne pathogens.
- B. Bloodborne Pathogens - means pathogenic microorganisms that are present in human blood and can cause disease in humans. These pathogens include, but are not limited to, Hepatitis B Virus (HBV) and Human Immunodeficiency Virus (HIV).
- C. Other potentially infectious materials means:
- | | |
|---------------------|-------------------------------|
| amniotic fluid | pleural fluid |
| body tissue | saliva (in dental procedures) |
| cerebrospinal fluid | semen |
| organs from a human | synovial fluid |
| pericardial fluid | vaginal secretions |
| peritoneal fluid | |
- Any body fluid that is visibly contaminated with blood and all body fluids in situations where it is difficult or impossible to differentiate between body fluids.
- HIV** - containing cell or tissue cultures, organ cultures and **HIV** or **HBV** containing culture medium or other solutions.
- D. Contaminated - means the presence or the reasonably anticipated presence of blood or other potentially infectious materials on an item or surface.

Montana State Hospital Policy and Procedure

INFECTION CONTROL – CARE OF CONTAMINATED ARTICLES OF CLOTHING AND LINEN

Page 2 of 4

- E. Contaminated Laundry - means laundry which has been soiled with blood or other potentially infectious materials or may contain sharps.

IV. RESPONSIBILITIES:

- A. Nursing Staff: in cases of contaminated clothing, nursing staff are responsible for care of patient clothing items.
- B. Housekeeping Manager: for collection and decontamination of non-washable contaminated or infested articles.

V. PROCEDURE:

- A. Laundry contaminated with blood and body fluids:
1. Any employee handling contaminated laundry will observe Standard Precautions; wearing protective gloves and a protective gown.
 2. Contaminated linen will be bagged separately from personal items using the same procedure as for personal items (see #3 below).
 3. Nursing personnel will:
 - a. First sort personal laundry items into washable and non-washable piles. Care will be taken to separate items requiring dry cleaning (e.g., a wool sweater or leather coat).
 - b. Wipe non-washable items such as restraint belts, leather shoes, belts and wallets with approved disinfectant solution.
 - c. Sort washable items into light and darks which will be kept separate throughout the laundry process.
 - d. Make a duplicate itemized list of all patient's personal contaminated items. Items on the lists should match the items in each bag.
 - e. First, place separated washable articles in, a dissolvable bag. (Items bagged together will be disinfected together regardless of the consequences.)
 - f. Then, place dissolvable bag into a clear plastic bag. **Do not overfill plastic bags.**
 - g. Attach one copy of the itemized list to the corresponding bag of laundry and put the other copy in the ward file.
 - h. Place the clear-bagged contaminated laundry into the clearly marked clothing receptacle in the soiled laundry room on each unit.
 4. Posey Restraints:
 - a. Place restraints after each use in a clear bag, mark with the sending unit, and send to laundry for laundering.

Page 3 of 4

5. Laundry personnel remove the itemized list and mark the clear bag “contaminated” and indicate the unit of origin.
6. Contaminated linen and washable personal laundry will be sent to the laundry service at Montana State Prison.

B. Non-washable items contaminated with lice or other parasites:

1. Nursing personnel will:
 - a. Make a duplicate itemized list of infested non-washable items and put one copy in the ward file.
 - b. Clear bag infested non-washable items and attach one copy of the itemized list.
 - c. Infested non-washable items include: restraint belts, wallets, leather belts, and shoes.
 - d. Send the infested items to the Housekeeping Manager.
 - e. Housekeeping Manager or designee will spray the inside of the bag(s) and contaminated articles with the appropriate decontaminate. The bag and contents must be left for 24 hours, then will be emptied and returned to the unit.

C. Contaminated disposable items:

1. Nursing personnel will:
 - a. Place disposable contaminated items in a red bag.
 - b. Dispose of red bag in the contaminated biohazard receptacles that are placed and labeled as biohazard in the sheds off of D-wing and Spratt unit.

D. Human waste and body fluids:

1. Nursing personnel will:
 - a. Empty bedpans, commode basins or toilet hats into the toilet or the hopper.
 - b. Manual rinsing of bedpans, commode basins or toilet hats should not occur in the patient’s bathroom or room.
 - c. Cover the human waste collection containers for transport.
 - d. Personal protective equipment will be used if deemed necessary or indicated to the situation when handling soiled commodes, bedpans or toilet hats.
 - e. When handling soiled linen, solid fecal matter that can be removed with a gloved hand should be disposed into the toilet, bedpan, or hopper.
 - f. Dispose of bedpans, or toilet hats in the general waste disposal.

Posey Velcro Restraints Laundering Instructions

Lower temperature washing and drying cycle for non-contaminated linen will prolong product life.

The "hook" of hook and loop closure material has a tendency to collect lint after repeated use and/or laundering, reducing the grip strength of the hook and loop. Test for secure hold before each use. Discard if it does not hold securely. Occasionally go over the "hook" with a stiff brush to remove lint. Fastening the "hook" to the "loop" during laundering will also help to prevent lint buildup.

DO NOT PUT STAINLESS STEEL BUCKLES THROUGH A WATER EXTRACTOR! It crushes the buckle. For maximum life, launder in a laundry bag.

Care of Contaminated Articles

Attachment B Policy #: IC-07

March, 2017

- ▶ **PURPOSE:** To identify methods for handling clothing and linen contaminated with bloodborne pathogens, other disease causing organisms, or parasites.
- ▶ **IMPORTANT DEFINITIONS:**
 - ◆ Standard Precautions- All human blood and certain human body fluids are to be treated as if known to be infectious for HIV, HBV and other bloodborne pathogens.
 - ◆ Bloodborne Pathogens - means pathogenic microorganisms that are present in human blood and can cause disease in humans. These pathogens include, but are not limited to, Hepatitis B Virus (HBV) and Human Immunodeficiency Virus (HIV).
 - ◆ Other potentially infectious materials means amniotic fluid, body tissue, saliva in dental procedures, pleural fluid, cerebrospinal fluid, semen, organs from a human, synovial fluid, pericardial fluid, vaginal secretions, or peritoneal fluid. Any body fluid that is visibly contaminated with blood and all body fluids in situations where it is difficult or impossible to differentiate between body fluids.
 - ◆ Contaminated - means the presence or the reasonably anticipated presence of blood or other potentially infectious materials on an item or surface.
 - ◆ Contaminated Laundry - means laundry which has been soiled with blood or other potentially infectious materials or may contain sharps.

Contaminated Laundry

- ⇒ Follow Standard Precautions.
- ⇒ Separate Linens from Personal Items and follow procedure below:
- ⇒ Sort into washable/non-washable piles.
- ⇒ Wipe non-washable items with approved disinfectant.
- ⇒ Sort washable items into light/darks to be kept separate.
- ⇒ Make duplicate itemized list of items.
- ⇒ Place separated, washable items in a dissolvable bag then a clear plastic bag. **Do not overfill.**
- ⇒ Attach one copy of itemized list on bag of laundry and the other in the patient file.
- ⇒ Place in clothing receptacle in the soiled laundry room on unit.
- ⇒ Posey Restraints are to be placed in a clear bag marked with unit after each use and sent to the laundry for laundering.

Non-washable Items contaminated with Lice or other Parasites (restraint belts, wallets, leather belts, and shoes)

- ⇒ Make duplicate itemized list of items, one copy goes in patient files.
- ⇒ Clear bag items and attach second copy of the itemized list.
- ⇒ Send items to Housekeeping Manager.

Contaminated Disposable Items

- ⇒ Place disposable items in a red bag.
- ⇒ Dispose of red bag in the contaminated bio-hazard receptacles that are in the sheds off of D-Wing and SPRATT.

Human Waste and Body Fluids

- ⇒ Use Personal Protective Equipment.
- ⇒ Empty bedpans, basins, or hats into toilet or hopper (manual rinsing should not occur in patients bathroom or room).
- ⇒ Cover human waste for transport.
- ⇒ Solid fecal matter should be removed from soiled linen and disposed of in toilet, bedpan, or hopper.
- ⇒ Dispose of bedpans and hats in regular garbage.
